## How to work your heating system

Switch heating on as shown on opposite page.

Allow 10 minutes for the system to start and heat to come through.

If heater does not start after 10 minutes it may be that the temperature in the boat is higher than set.

Set the temperature to maximum, and check the boat batteries are charged. If necessary start engine to charge batteries.

If this does not work please call the on call engineer. 01603 782625 option 3

When heater is switched off it will continue to run for up to 10 minutes while it cools itself down.

# HEATING CONTROL

YOUR BOAT IS EQUIPPED WITH THIS HEATING CONTROL.
